

SpectralBot (www.spectralbot.com) is a young start-up, creating a software platform that helps our customers use, troubleshoot, train and assist the professional equipment they use on live events and installations. We mainly work for the entertainment industry (live events, touring, theme parks, corporate events & exhibitions ...).

We are a small team, and at this stage we have the need for an eager, curious yet skilled **Full-Stack Web Developer** to further extend our platform.

The most important skills we're looking for, are:

- Designing, developing and testing our platform based on NodeJS (Typescript) and VueJS.
- Integrating, configuring and deploying your work on the Google Cloud Platform.
- Understanding what 'docker compose up' means, and how to tweak a 'container'.
- Knowing how to implement a socket connection.
- Being able to work as an independent team player.
- Actively participating in (English spoken) meetings.
- Supporting our customers and their users.
- Optionally, some occasional travel.

To better understand what SpectralBot stands for, these are our core values:

- **Support:** help & support is the bedrock of our mission. A supportive mindset is crucial. It all starts with the willingness to support our customers, users and your team members.
- **Pragmatism:** we are a results-driven company with a no-nonsense approach to getting things done. We prefer practical solutions that are effective, efficient, and align with our core values and mission.

- **Enthusiasm:** we encourage a culture of positive energy, active participation, and having some fun while getting things done.
- **Collaboration:** we believe in the power of collaboration and teamwork to move our company forward. Our team members can work independently, but also understand the value of working together to achieve higher goals.
- **Creativity:** we value and encourage creative ideas and input from all team members. We believe that diverse perspectives and ideas are essential to achieving our goals and providing the best possible products and services to our customers.

If you kept reading until this point, and you're interested in this job, this is what we can offer you:

- Being part of an exciting tech start-up in a very entertaining industry.
- Getting to work with and around the latest, emerging technologies.
- Freedom to explore, initiate and create.
- Opportunities to learn on the job.
- Competitive salary, with benefits.
- Work-life balance with the possibility to work from home.
